

TJ Tube Fenders

- Made from 1.250" o.d. x .120" wall DOM tubing, these fenders aren't afraid to rub against a tree or rock.
- Increased fenderwell clearance... **with more than 2" additional tire clearance at the outside rear...** and no sharp edges!
- CNC laser cut from heavy duty 11 ga. steel, the bolt-on top and side panels prevent mud and water from being trapped.
- 18-8 Stainless button head bolts backed by nutserts secure the panels.
- Mandrel bent and jig welded to ensure accuracy and fit, each fender is hand inspected for quality control and comes ready to paint.

Starting at
\$375⁰⁰
pr

OPTION 1
Universal front light panels that can be cut for the light of your choice. A template is included for the OEM TJ side marker – \$20.

OPTION 2 Front light panels, pre-cut for the OEM TJ side markers, with wiring harness kit. Allows for running just the side markers – \$40.

- Easily installed... in your driveway... in under 4 hours (cutting & drilling required).

The OEM flare can be easily modified to fit.

Dealer inquiries welcomed.

The additional fenderwell clearance is evident. Pictured here are 38's on 5 1/2" of lift.

Got an air compressor under your brake booster? The removable side panels allow for easy access. Backed by nutserts, the panels can simply be removed from the outside.
